Educational panel – Mechanism
VVZ-EDU019-T

VVZ-EDU019-T Educational panel – Mechanism

This interactive educational panel demonstrates the fundamental principles of mechanics and gears using interconnected rotating cogs. The unit develops technical thinking, an understanding of cause and effect, and children's fine motor skills through play. The supporting structure of the panel is manufactured from galvanised steel with a durable powder-coated finish. The play board itself and the mechanical components are crafted from high-quality HPL material. This material is chemically resistant, colourfast, non-toxic, recyclable and shatterproof, eliminating any risk of injury from sharp edges or splinters. For maximum safety and extended service life, all stainless steel fasteners are enclosed in plastic protective caps.

Specifications

The Educational panel – Mechanism VVZ-EDU019-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	0.90 x 0.05 x 1.30 m (L x W x H)
Materials:	HPL, Galvanised and powder-coated steel, stainless steel fasteners
Weight:	20 kg
