

Single-Tower Combined Play Structure - Low VVZ-VZ1-010-10-T

VVZ-VZ1-010-10-T Single-Tower Combined Play Structure - Low

This single-tower combined play structure invites children to climb up via steps or a rope climbing wall, then descend on one of two slides. Its bold design catches children's attention from a distance and invites active play. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant, color-stable, non-toxic, recyclable, and shatter-resistant, eliminating the risk of injury to children from sharp edges or splinters. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All joints are made of stainless steel and covered with plastic protective caps to increase durability and safety.

Specifications

The Single-Tower Combined Play Structure - Low VVZ-VZ1-010-10-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	2.70 x 3.20 x 2.00 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	6.10 x 6.50 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, polypropylene rope, stainless steel fasteners
