

Single-Tower Combined Play Structure – Tall with Swing VVZ-VZ1-011-10-T

VVZ-VZ1-011-10-T Single-Tower Combined Play Structure – Tall with Swing

This single-tower combined play structure features a tower that children can climb via steps and descend using the slide. The play structure also includes a double swing beam with two Standard or Baby seats, or a combination of both. Its striking design invites children to play from a distance. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant, colour-stable, non-toxic, recyclable and shatter-resistant, helping to prevent injuries from sharp edges or fragments. All joints are made of stainless steel and covered with plastic protective caps for increased durability and safety.
