VVZ-VZ3-001-10-T Triple-Tower Combined Structure - Tall

Triple-tower combined play structure - two towers are connected to a central tower with ramparts by a rope bridge and a tunnel. Children can climb onto the structure using steps, a vertical climbing wall with handholds, or a climbing net, and descend using one of three slides. The striking design invites children to play from a distance. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage. This prevents children from being injured by sharp edges or fragments. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases its strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and features high strength. All joints are made of stainless steel and covered with plastic protective caps to increase durability and safety.

Specifications

The Triple-Tower Combined Structure - Tall VVZ-VZ3-001-10-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	5.80 x 3.20 x 3.10 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	8.90 x 6.60 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, corrugated pipe, polypropylene rope, stainless steel fasteners
