

Triple-Tower Combined Play Structure - Tall VVZ-VZ3-003-10-T

VVZ-VZ3-003-10-T Triple-Tower Combined Play Structure - Tall

A triple-tower combined play structure arranged in an L-shape. Two towers are connected to the central tower with ramparts by a rope bridge and a tunnel. Children can climb onto the structure using steps, a sloped climbing wall with handholds and a rope, or a climbing net, and can descend via one of three slides. The bold design invites play from a distance. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage. This prevents children from being injured by sharp edges or fragments. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases its strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All connections are made of stainless steel and covered with plastic protective caps to increase durability and safety.

Specifications

The Triple-Tower Combined Play Structure - Tall VVZ-VZ3-003-10-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	5.60 x 5.10 x 3.10 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	8.90 x 8.50 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, corrugated pipe, polypropylene rope, stainless steel fasteners
