Five-Tower Combined Play Structure - Tall
VVZ-VZ5-001-10-T

VVZ-VZ5-001-10-T Five-Tower Combined Play Structure - Tall

Five-tower combined play structure. Two towers with ramparts and three low towers are connected by a rope bridge, a rope balance bridge, and two tunnels. The structure includes steps, sloped climbing walls, climbing bars, vertical climbing nets, ladders, and a slide. The bold design catches children's attention and invites play from a distance. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage. This means there is no risk of children being injured by sharp edges or splinters. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All joints are made of stainless steel and covered with plastic protective caps to enhance durability and safety.

Specifications

The Five-Tower Combined Play Structure - Tall VVZ-VZ5-001-10-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	6.30 x 5.70 x 3.10 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	9.30 x 9.10 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, corrugated pipe, polypropylene rope, stainless steel fasteners
Weight:	915 kg
