

Four-Tower Combined Play Structure - High VVZ-VZP4-003-15-T

VVZ-VZP4-003-15-T Four-Tower Combined Play Structure - High

The four-tower combined play structure. Two towers with battlements and two low towers are connected by sloped rope bridges, a fixed bridge, and a tunnel. Children can access the structure via steps, a sloped climbing wall with handholds, a sloped rope net, and a ladder. They can get back down via one of the two slides. The structure also features a wall with themed cutouts and a curved balcony. The steel structure is weather-resistant, thanks to galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant, colorfast, non-toxic, recyclable, and shatter-resistant. This eliminates the risk of injury to children from sharp edges or splinters. The ropes are made of polyester fibers wound around a central reinforcement, increasing strength and resistance to mechanical wear. Polyester itself is resistant to micro-organisms and weathering, dries quickly after rain, is colorfast, and offers high strength. All fasteners are made of stainless steel and covered with plastic protective caps to increase durability and safety.

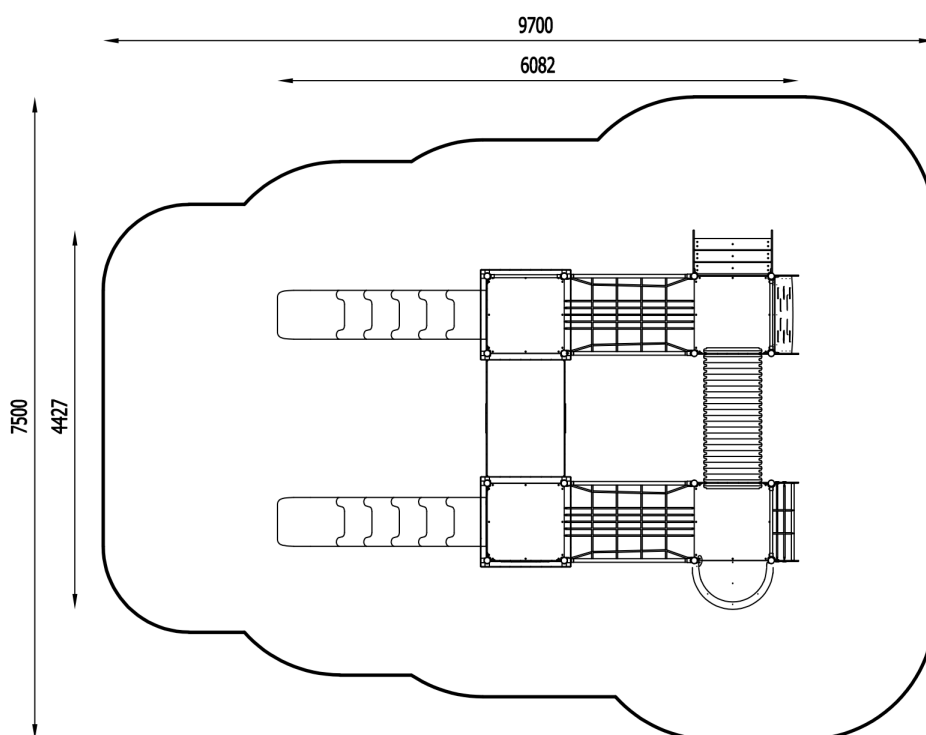

Specifications

The Four-Tower Combined Play Structure - High VVZ-VZP4-003-15-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	6.10 x 4.50 x 4.00 m (L x W x H)
Max. Fall Height:	up to 1.50 m
Safety Surfacing Area:	9.70 x 7.50 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, PA, polypropylene ropes, corrugated pipe, stainless steel fasteners
