

Triple-Tower Combined Play Structure - High VVZ-VZP3-003-10-T

VVZ-VZP3-003-10-T Triple-Tower Combined Play Structure - High

The L-shaped triple-tower combined play structure. Two towers are connected to a central tower with battlements by a rope balance bridge and a tunnel. Children can access the structure via steps, a sloped climbing wall with handholds, and a rope climber. They can get back down via one of the three slides. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant, colorfast, non-toxic, recyclable, and shatter-resistant. This eliminates the risk of injury to children from sharp edges or splinters. The ropes are made of polyester fibers wound around a central reinforcement, increasing strength and resistance to mechanical wear. Polyester itself is resistant to micro-organisms and weathering, dries quickly after rain, is colorfast, and offers high strength. All fasteners are made of stainless steel and covered with plastic protective caps to increase durability and safety.

Specifications

Triple-Tower Combined Play Structure - Tall VVZ-VZP3-003-10-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	5.70 x 5.20 x 3.50 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	8.90 x 8.70 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, PA, corrugated pipe, polypropylene ropes, stainless steel fasteners

Triple-Tower Combined Play Structure - High VVZ-VZP3-003-10-T
