

Rope Structure - High Wall VVZ-LP006-T

VVZ-LP006-T Rope Structure - High Wall

Large rope climbing wall - a three-meter centerpiece for any playground. The tall and wide rope climbing wall is supported by four arched legs for greater stability, which children can also use as a bar for hanging, somersaults, or climbing. The product is made of galvanised steel with a high-quality surface finish, and the joints are stainless steel and covered with plastic protective caps to enhance the safety and service life of the connections. The ropes are made of polyester fibers wound around a central core. This rope construction increases its strength and resistance to mechanical stress. Polyester itself has many positive properties. It is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and is characterized by high strength. The large rope climbing wall VVZ-LP006-T is certified according to STN EN 1176.

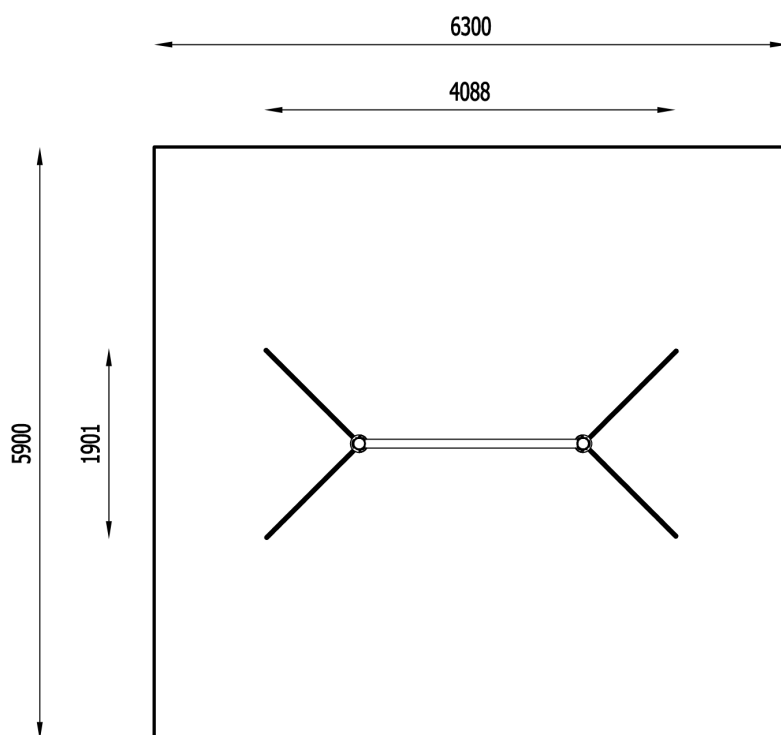

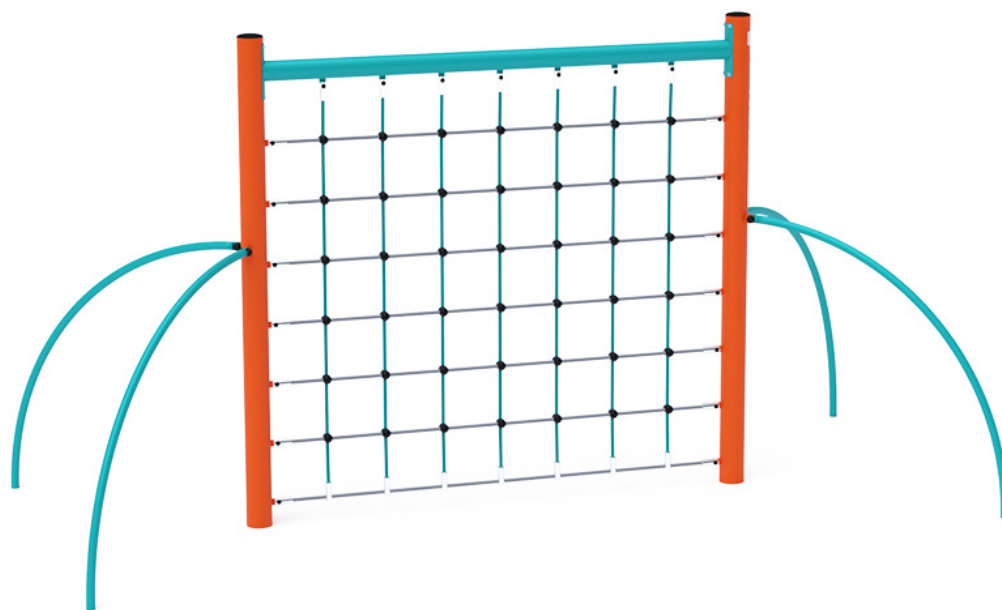

Specifications

The Rope Structure - High Wall VVZ-LP006-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	4.00 x 1.90 x 3.00 m (L x W x H)
Max. Fall Height:	up to 2.00 m
Safety Surfacing Area:	6.30 x 5.90 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, polypropylene rope, stainless steel fasteners
