

Rope Structure - Balance Bridge with Rope Wall VVZ-LP021-T

VVZ-LP021-T Rope Structure - Balance Bridge with Rope Wall

The Balance Bridge with Rope Wall is designed not only for small climbers, but also for children who want to train their balance. The structure is made of galvanised steel treated with a layer of baked-on KOMAXIT powder coating. The anti-slip treads are made of recyclable HPL panels. All joints are stainless steel and covered with plastic protective caps to increase the safety and service life of the connections. The ropes are made of polyester fibers wound around a central core. This rope construction increases its strength and resistance to mechanical stress. Polyester itself has many positive properties: it is resistant to microorganisms and weathering, dries quickly after rain, is colorfast, and is characterized by high strength.

Specifications

The Rope Structure - Balance Bridge with Rope Wall VVZ-LP021-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	6.40 x 5.10 x 2.50 m (L x W x H)
Max. Fall Height:	up to 2.50 m
Safety Surfacing Area:	10.00 x 9.00 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HDPE, HPL, polypropylene rope, stainless steel fasteners
