VVZ-OP1-02-T Monkey trail – Balance bars

The monkey trail with balance bars is a play element that naturally supports the development of coordination, stability, balance and overall agility. As children move across the individual suspended bars, they engage their whole body while developing confidence in movement. The balance bars are suspended on strong polyester ropes that offer high resistance to mechanical stress and weathering. The steel structure with a durable surface finish, together with stainless-steel fasteners, ensures high durability and a long service life in outdoor environments.
