VVZ-OP1-10-T Monkey trail – High rope net

The monkey trail with a high rope net provides children with a larger climbing surface complemented by an upper horizontal bar. As children move across the net, they engage their arms and whole body while naturally developing strength, coordination, stability and overall agility. The strong polyester ropes offer high resistance to mechanical stress and weathering. The steel structure with a durable surface finish, together with stainless-steel fasteners, ensures high durability and a long service life in outdoor environments.
