

Four-part monkey trail VVZ-OP4-03-T

VVZ-OP4-03-T Four-part monkey trail

The quadruple monkey trail combines a spider rope net, balance ladder, freely suspended balance stones and balance bars. The individual sections move in different ways during use, naturally increasing the challenge of maintaining balance, stability and coordination. The spider net also develops upper-body strength, while the balancing elements support agility and confidence in movement. The steel structure with a durable surface finish, strong polyester ropes and stainless-steel fasteners ensures high durability and a long service life in outdoor environments
