VVZ-PYR025-T Rope pyramid – 2.5m

The 2.5 m rope pyramid creates a larger three-dimensional climbing net offering children numerous ways to climb and progress through the individual levels. Movement across the rope structure naturally supports the development of coordination, balance, strength, endurance and overall agility. The strong polyester ropes are resistant to mechanical stress and weathering. The steel structure with a durable surface finish, together with stainless-steel fasteners, ensures high durability and a long service life in outdoor environments.
