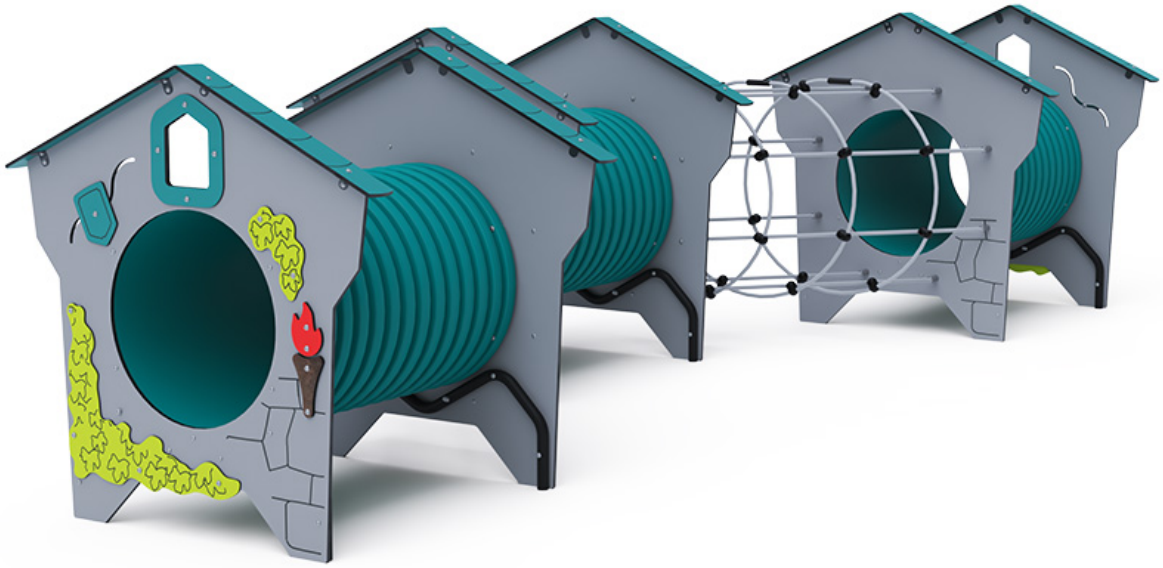
Curved tunnel play structure – Playhouse VVZ-TU004-5



VVZ-TU004-5 Curved tunnel play structure – Playhouse

This play product in the shape of a house with a plastic tunnel is our large version in this series. The play structure consists of three tunnels connected by two rope tunnels. The themed design stimulates children's imagination and invites creative, role-play exploration. The front and rear graphic panels are made of HPL material, ensuring long service life, color stability, and safety. HPL is an eco-friendly material that is chemically resistant, UV-resistant, non-toxic, recyclable, and resistant to breakage - eliminating the risk of injury from sharp edges or splinters. The ropes are made of polyester fibers wound around a central core. This rope construction increases its strength and resistance to mechanical wear. Polyester itself has many positive properties: it is resistant to microorganisms and weathering, dries quickly after rain, is colorfast, and features high strength. All fasteners are stainless steel.

Specifications

The Curved tunnel play structure – Playhouse VVZ-TU004-5 is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	6.50 x 1.50 x 1.30 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	9.50 x 4.50 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, polypropylene rope, corrugated pipe, stainless steel fasteners
