

Single-Tower Play Structure VVZ-VZD1-006-1-10

VVZ-VZD1-006-1-10 Single-Tower Play Structure

This single-tower combined play structure features a tower with a small roof, which children can climb via the climbing wall or steps and descend using the slide. The play structure also includes a swing beam with a Classic or Baby seat. The green-brown design, inspired by nature, invites children to play from a distance. The HPL material used is chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage, so there is no risk of injury from sharp edges or splinters. The posts are made of BSH beams treated with a weather-resistant and UV-resistant coating. All joints are stainless steel and covered with plastic protective caps for increased durability and safety.
