

## Single-Tower Play Structure VVZ-VZD1-010-10

### VVZ-VZD1-010-10 Single-Tower Play Structure

This single-tower combined play structure features a tower that children can climb using steps or a rope climbing wall, and descend using one of two slides. The green-brown design, inspired by nature, invites children to play from a distance. The HPL material used is chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and shatter-resistant. This means there is no risk of injury to children from sharp edges or fragments. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases its strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and is characterized by high strength. The posts are made of BSH beams treated with a weather-resistant and UV-resistant coating. All joints are made of stainless steel and covered with plastic protective caps to increase durability and safety.

### Specifications

The Single-Tower Play Structure VVZ-VZD1-010-10 is certified according to STN EN 1176

|                               |                                                                                                                                              |
|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Age Group:</b>             | 3-14 years                                                                                                                                   |
| <b>Product Dimensions:</b>    | 2.70 x 3.20 x 2.00 m (L x W x H)                                                                                                             |
| <b>Max. Fall Height:</b>      | up to 0.99 m                                                                                                                                 |
| <b>Safety Surfacing Area:</b> | 6.10 x 6.50 m (according to STN EN 1176-1)                                                                                                   |
| <b>Materials:</b>             | Galvanised and powder-coated steel, PA, HPL panels min. thickness 6, 10, and 13 mm, HDPE plastic, polyester ropes, stainless steel fasteners |
