

Double-Tower Play Structure VVZ-VZD2-007-10

VVZ-VZD2-007-10 Double-Tower Play Structure

This combined double-tower play structure features a tall tower with a small roof and a low tower, connected by a rope balance bridge. Children can climb up via a climbing wall with handholds, a ladder, a climbing net, or steps, and come back down using one of two slides. The green-brown design, inspired by nature, invites children to play from a distance. The HPL panels used are chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage, eliminating the risk of injury from sharp edges or splinters. The posts are made of laminated timber beams (BSH) treated with a coating resistant to weathering and UV radiation. The ropes are made of polyester fibers wound around a central reinforcement, a construction that increases strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All joints are made of stainless steel and covered with plastic protective caps for increased durability and safety.

Specifications

The Double-Tower Play Structure VVZ-VZD2-007-10 is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	5.60 x 3.00 x 3.20 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	8.90 x 6.30 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, PA, HPL panels min. thickness 6, 10, and 13 mm, HDPE plastic, polyester ropes, stainless steel fasteners
